DETAILED ACTION

Allowable Subject Matter

1. Claims 1-27 are allowed over the prior art of record.

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a virtual space information processing system for controlling the display of an avatar, the system comprising a detection device configured to collect living body information regarding a user; a condition manager communicatively coupled to the detection device to receive the collected living body information, the condition manager configured to store a plurality of state conditions corresponding to the collected living body information wherein each of the plurality of state conditions includes a plurality of levels; a feeling expression generated in response to one of the plurality of state conditions and one of the plurality of levels corresponding to the collected plurality living body information; and a data storage device for storing graphical data of the avatar that correspond to the generated feeling expression. These features are not found or suggested in the prior art.

The present invention is directed to a condition manager communicatively coupled to the detection device to receive the collected living body information, the condition manager configured to store a plurality of state conditions corresponding to the collected living body information wherein each of the plurality of state conditions includes a plurality of levels; a feeling expression generated in response to one of the plurality of state conditions and one of the plurality of levels corresponding to the collected plurality living body information; and a data storage device for storing graphical data of the avatar that correspond to the generated feeling

expression. Each independent claim is identified the uniquely distinct features "a condition manager communicatively coupled to the detection device to receive the collected living body information, the condition manager configured to store a plurality of state conditions corresponding to the collected living body information wherein each of the plurality of state conditions includes a plurality of levels; a feeling expression generated in response to one of the plurality of state conditions and one of the plurality of levels corresponding to the collected plurality living body information." The closest prior arts Liles and Skelly disclose a conventional system the sequence and time intervals determining a duration for displaying each visual frame of the sequence are indicated; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
